Ardrossan, AB • www.codiakacres.com

(780) 998-5483 • Gary's cell (780) 974-5793 • codiak@albertacom.com

It is an honor to be hosting the 8th Annual Summit 3 sale. Our thanks go out to our Summit partners, our Australian partners, our family, sale staff and our farm staff. These events do not just happen. Good people make them happen.

Sophisticated testing procedures allows for better animal selection. Codiak sale cattle have been tested genetically for polled, coat colour and myostatin. In addition, the cattle are tested under the Q-Select program. Testing allows us to genetically select the best possible matings. As we move ahead we will continue to not only test our herd sires but also our females. Please feel free to request test results from us prior to the sale. We can perhaps help guide you in the direction you choose to move in your own program.

Codiak bulls are raised for the first winter on 5 lbs of barley and silage. The summer is spent on pasture only. Six months prior to the sale they are fed whole oats for two months and then a 13% grower pellet ration. Our vaccination protocol for the bulls is Pyramid FP10, Vision 8 with Somnus and Multimin 90. Our complete protocol will be available with our supplement sheets including a commentary from our herd veterinarian, Dr. Graeme Boender.

Please join us on the 30th for a look through the cattle and again on sale day, the 31st for dinner and refreshments.

RIVER HILL FARM

Barry & Elaine Ducherer • Cory & Katlin and Hennessy

Neilburg, SK • www.riverhill.ca

Barry: (780) 205-2478 • Cory: (780) 870-7584 • riverhillfarm@hotmail.com

What an exciting time for Speckle Park Cattle, we have never been more thrilled to be a part of this amazing breed. We are proud to partner with Codiak Acres and Colgan's Cattle in the 8th Annual Summit 3 Sale, and look forward to seeing exceptional bulls, premium females, genetics, and of course, all our past and future customers.

River Hill recommends and uses a full herd health program. Our bulls have been developed on a high-quality hay ration, along with a 14% bull grower pellet. Our sale cattle have all being genetically tested for polled, coat color and myostatin. In addition, the cattle are tested under the Q-Select program. The goal is always to produce a sound animal, with high performance. If you have any questions on which animal might be right for your herd, feel free to inquire with Barry or Cory, we are happy to answer any questions, or assist in finding the right bull or genetics for your herd. We are committed

to bringing the best bulls we raise to the sale, and are excited about the diversity and quality of this year's sale animals.

We would like to take this opportunity to thank our customers from near and far, we appreciate your business and more importantly the friendships that have formed over the years. Cattle are our passion and it is because of you we can wake up every day and do what we love! Thank you to our sale hosts and partners; it's a pleasure and an honor to work with you. Thank you to Carla, Mark and the boys for always helping out whenever needed. Thank you to our herdsman of 20+ years, Floyd Whitney, and all those who fit and care for our animals throughout the show and sale seasons. Without all this support a successful sale is not possible.

COLGAN'S CATTLE

Tony & Tammy, Colton and Logan Freimark

Lashburn, SK • www.colgancattle.com

(780) 205-8229 • colgancattle@sasktel.net

We would like to welcome everyone to this year's sale and say how excited we are to once again be part of the Summit 3 Sale. We are extremely proud of our pen of bulls this year. We have what we believe, is an excellent lineup of bulls that will work for both the commercial cattlemen and purebred breeders, and in the end will add pounds and dollars to the bottom line for the producers. Our animals have been developed on a high quality home grown hay ration, supplemented with at 14% textured ration, and are on a full herd health program. Our focus over the past year has been to improve our genetics through genetic defect testing (polled/horned, coat color and myostatin). We are pleased to be able to say that our entire offering are homozygous polled and homozygous black for coat color, with only 20% carrying the myostatin gene. Each animal offered in the sale will be tested for breeding soundness and has been tested for

genetic defects and genomic traits (Q-select). We would like to thank our partners in the Summit 3 Sale, Codiak Acres and Riverhill Farms. In addition, we would like to thank everyone behind the scenes and all of our past and future buyers. Hopefully you can take the time to make our sale and source your future genetics here. You are welcome to come to the farm anytime to check out our program and see the bulls.

Rarely does an opportunity come along to get exclusive semen on a proven sire. Bazinga sired the high selling group of bulls for River Hill at last year's sale. Seize the opportunity to be one of few breeders using Bazinga for purebred use in 2018. With his dam being a daughter of the cow-maker Moofassa and the outcross Legacy bred sire, this unique breeding piece could be used to build a herd of females or build a tremendous reputation with commercial cattlemen.

The calves are eligible to be registered as PUREBRED. *Storage and delivery fees are the responsibility of the purchaser. Guaranteed one pregnancy if implanted by a licensed technician. Consigned by Colgan's Cattle Company.*

INTERPRETING

Genomic TEST RESULTS

THE SPECKLE PARK BREED offers enormous value to the beef industry in terms of enhancing carcass quality through their inherent ability to develop intramuscular fat, also known as marbling. Quantum Genetix is a genetic testing company from Saskatoon, Saskatchewan, that offers several performance-trait genomic tests, including PMCH, igf2, and CrH4 (see below).

The members of the Summit 3 Sale group are committed to providing buyers with as much pertinent information as possible, in order to assist you with making the best acquisitions for your program. To this end, you will see that all the bulls have a genotype included for each of these three genes.

Certainly, we encourage you to use this information as simply another tool in the arsenal; herdsire selection should always be a balanced, multi-trait, wholistic endeavour.

If you've any questions, please feel free to ask or take a look at Quantum's website, <http://genetix.quantumgenetix.com>.

PMCH is a gene test that defines alleles as A or T. When compared to TT genotypes, AA genotypes will have an increased fat deposition, with results of increased tenderness, marbling, and 12th-rib backfat.

igf2 test results will show cattle with alleles to be either C or T (note that these are not the same alleles as those of the PMCH test). Cattle with the igf2 genotype of CC have larger ribeyes than TT genotypes.

crH4 test results will show cattle with alleles to be either G or C. GG-genotype cattle are able to handle stress better, resulting in increased hot carcass weight and increased ribeye size as compared to CC-genotype cattle.

Travel 3/4 mile, farm is on left.

GENETIC TESTING

INTERESTED IN TEST RESULTS ON HERD SIREs? Many of the sires represented by offspring in this catalogue have been tested for a variety of genetic markers. Please contact any of the owners to request results for homozygous polled, red carrier, Myostatin, Leptin, PMCH, *igf2*, or *chH4*.

TERMS The terms of the sale are cash or cheque payable sale day in Canadian Dollars, March 31, 2018, to the producer of the animal(s) purchased. All settlements must be made with the sale clerk before the animals will be released, unless there has been an agreement made between the seller and purchaser prior to the sale.

DISPUTES In case of disputes the bidding will be reopened between the parties. If there are no further bids, the buyer will be the person the auctioneer accepted the last bid from. The auctioneer's decision in such matters will be final.

INSURANCE Each animal becomes the risk of the purchaser at the time of sale. If the animals are not taken home by the new owner sale day, arrangements must be made with the seller on March 31, 2018 for delivery. Animals returning to the seller's farm must be insured.

HEALTH GUARANTEES All bulls and females are guaranteed breeders and in good breeding condition. All bulls are semen tested & guaranteed to be breeders. Each animal becomes the responsibility of the purchaser as soon as sold. All bulls must be insured.

DELIVERY We are pleased to deliver cattle free of charge within 250 miles, further at cost. Anyone taking advantage of the free trucking must insure their bulls. Free board is offered until May 1, 2018, and at a cost of \$3/day thereafter.

IN-HERD SEMEN Summit 3 consignors reserve the right to draw semen for in-herd use - at their expense and at the buyer's convenience - on any bull in the sale.

LIABILITIES: All persons attend the sale at their own risk. The seller, facility owner and sale manager assume no liability, legal or otherwise, for accidents that occur. Please DO NOT enter the pens of bulls with children.

ANNOUNCEMENTS All announcements made from the auctioneer's stand take priority over printed or catalogued material.
